REPORT

ON THE

RAIL-BORNE TRAFFIC OF BENGAL

During the year 1893-94.

THIS Report, the tenth of its kind, furnishes statistics of the total trade, external and internal, of the Lower Provinces of Bengal, carried by rail during the year 1893-94 as registered under the block system.

2. The Report is based on returns furnished by the officers named in the margin, and on the following Reports, viz., the

Assistant Auditor, East Indian Railway, Jamalpur.

Director of Land Records and Agriculture, Bombay.

Auditor and Examiner, Bengal North-Western and Tirhut Railways, Goruckpore.

Auditor, Oudh and Rohilkhand Railway, Lucknow.

Examiner of Accounts, North-Western Railway, Lahore.

Examiner of Accounts, Eastern Bengal State Railway System, Sealdah (Calcutta).

Auditor, Bengal-Nagpur Railway.

Report on the earnings of the East Indian Railway Company; the Report by the Collector of Customs, Calcutta; the Reports by the Railway authorities on trade fluctuations and changes in railway freights; the sections relating to weather and crops, manufactures and mines; and trade and commerce in the General Administration Reports submitted to Government by Commissioners of Divisions; the crop reports of the Director of Agriculture, Bengal; and the trade valuation statements received from 12 selected District Officers, the Collector of Customs, Calcutta, the Board of Revenue, L.P., the Calcutta

tea and indigo brokers, and from the several Local Governments and Administrations in India.

3. In paragraph 6 of Revenue and Agricultural Department Circular No. 45 of 9th May 1888, the Government of India

Valuation of articles of trade.

suggested that the officers charged with the preparation of the lists of value rates should freely correspond with one another, with a view to assimilating, as far as possible, the value rates assigned to articles in the Inland Trade Returns. From enquiries made by the Government of India, it appeared that various methods of obtaining value rates were adopted in different parts of India, and in order to effect an improvement of the returns that Government has, in Revenue and Agricultural Department Circular No. 31, dated the 13th June 1893, laid down the following rules for observance in all Provinces:—

- (1) The values should be based on wholesale prices, not retail.
- (2) The values fixed for the quarterly returns may be the average of weekly or other periodical price quotations, or may be the average of prices prevailing on different dates during the period of active sale, but should not be the prices prevailing merely on a single date.
- (3) The values fixed for the annual returns may be taken as one-fourth of the sum of the values fixed for the quarterly returns.
- (4) The marts of which the prices are adopted, though they should be as representative as possible, need not exceed three or four in each Province.

In accordance with these instructions, and after consulting the local officers, the Government of Bengal has selected four

*(1) Calcutta. | (3) Narainganj.
(2) Sirajganj. | (4) Patna City.

marts* from which quarterly valuation statements are being obtained from 1st April 1894, based on the average of the prices ruling on the last day of each month in those marts.

4. No measures were taken during the year for the registration of inland trade other than that dealt with in the river-borne traffic report of Bengal.

CHAPTER I.

GENERAL SUMMARY OF THE SEASONS AND RESULTS OF THE HARVESTS AND NOTICE OF PRICES.

THE past year was one of abundant rainfall in every part of the Province, and its distribution, though not favourable to the rainy season crops, was generally beneficial to the later or winter rice crop. Except in a few districts of North Bengal and North Bihar, the heavy rain during April, May, June, and July retarded sowing and weeding operations and delayed transplantation, while in low lands the crops suffered from accumulation of water. In August the rainfall was generally short of the normal, but during that month and the early part of September many of the districts in East Bengal and parts of North Bihar were visited by destructive floods. The heavy rains of October were followed by a long period of rainless weather, which continued till the end of January. Early in February, however, moderate showers fell in Bihar and in parts of Chota Nagpur and North Bengal, while elsewhere there was no rain till the close of February, when a period of wet weather set in throughout these Provinces and lasted till the close of the first week in March. Taking all the harvests of the year together, it is estimated that the produce of food during the past year was a little below the average.

2. The *bhadoi* or *aus* rice crop was, as stated above, considerably damaged by the excessive rain and by floods; the outturn for the whole Province averaged 11 annas, against a 16-anna crop in 1892-93. The heavy rains of October were favourable to the *aman* or winter rice—the principal crop of the year—the outturn for the whole Province being estimated as 16 annas, against 14 annas in 1892-93; in two districts the yield was a bumper crop, or 20 annas, in six districts it was 18 annas, and in four districts it was 17 annas, while in nine others there was a full average crop. In some parts, however, it was almost a total failure, owing to the prevalence of floods. The *rabi* crops, comprising cereals and pulses, were seriously affected by the failure of the cold-weather rains, and were it not for the moderate showers in February, the yield would have been much less than it was in the previous year: the outturn for the whole Province was estimated as 13-anna crop, against a 14-anna crop in 1892-93. The *oil-seeds* crop, in common with the *rabi* crops, suffered from absence of rain in the cold weather, the outturn for the whole of Bengal being about the same as in 1892-93, viz., 12 annas; in only one district, viz. Monghyr, was the outturn a full average, while in 15 districts it varied from 12 to 15 annas. Owing to the entire cessation of rain from October to January, coupled with the wet and cloudy weather in the subsequent months, the *wheat* harvest yielded only 12 annas, against 14 annas in 1892-93; the Champaran and Muzaffarpur districts were the only two that reaped a full average crop. The outturn of *barley* was 13 annas, against 10 annas in 1892-93.

3. For *indigo* the past year was a disappointing one. The year commenced with good moisture, but the subsequent rainfall was excessive, and the outturn was only two-thirds of what was expected. In the Bhagalpur and Presidency Divisions the plants grew well, but the incessant rains washed out the colour from the leaves, and reduced the ultimate outturn. The heavy rain in the beginning of the year damaged the *jute* crop, the outturn for the whole Province averaging 13½ annas, against 16 annas in 1892-93: in the districts of Purnea and Bogra it was an 18-anna crop. The excessive rainfall interfered with the timely preparation of land and the sowing operations for poppy; and the yield of opium was the lowest ever known. *Sugarcane* yielded a 12½-anna crop, against a 13½-anna crop. The *tobacco* crop averaged 14 annas, against 13½ annas in the previous year. Owing to the failure of the cold-weather rains, the *ganja* crop gave an outturn of only 10 annas, against a full average crop in 1892-93.

4. The following table, which has been prepared from the crop reports published by the Director of Land Records and Agriculture, Bengal, shows the estimated outturn of some of the principal crops, Division by Division, during the past two years:—

7. With reference to the list of value rates for the year 1893-94, which was appended to the returns of the Rail and River-borne trade of Bengal for the quarter ending the 31st March 1894, and is also given in the appendix to this report, the Government of India, in the Revenue and Agricultural Department's letter No. ³⁴⁶⁷/₁₀, dated the 1st August 1894, have directed that the causes of the variations in the rates of the articles noted in the margin, as compared with those for the previous year, should be explained in this review. The necessary explanations are accordingly furnished.

8. *Indigo*.—The fall of 28.74 per cent. in the price of this article as compared with that of 1892-93 is due to the inferior quality of the past year's outturn.

9. *Wooden sleepers*.—The fall in the value rate under this head from Rs. 2.4 per maund in 1892-93 to Re. 1 per maund in 1893-94 is ascribed to a small trade in sleepers during the past year.

10. *Silk, raw, foreign*.—The cause of the rise in the price of this article from Rs. 221-12 per maund in 1892-93 to Rs. 433 per maund in the year under review is explained by the Collector of Customs, Calcutta, to be due to the large importation of Italian silk by firms connected with the silk industry in Bengal.

11. *Silk piece-goods (Indian)*.—The rise in the value rate of Indian silk piece-goods from Rs. 760-8 per maund in 1892-93 to Rs. 913 per maund in 1893-94 is mainly due to the rate for the Dacca district having been quoted at Rs. 1,020 per maund in 1893-94, against Rs. 500 per maund in 1892-93: the latter rate represented the price of goods containing an admixture of cotton and silk.

CHAPTER II.

EXTERNAL TRADE OF BENGAL.

STATEMENT II.

THE following abstract shows for the past two years the total weight and value of the external rail-borne trade of Bengal with other Provinces:—

		1892-93.		1893-94.	
		Quantity. Mds.	Value. Rs.	Quantity. Mds.	Value. Rs.
Imports into Bengal	...	1,86,51,950	11,03,27,357	1,63,44,657	11,10,76,687
Exports from Bengal	...	1,69,82,917	9,60,20,197	1,77,39,346	9,65,56,587
Total	...	3,56,34,867	20,63,47,554	3,40,84,003	20,76,33,274

The increases noticed in the reports for the past three years received a slight check during the year under review, the decline in the total trade carried both ways being 15,50,864 maunds, or 4·36 per cent. The decrease, it will be observed, was entirely in the import trade, which fell by 23,07,293 maunds, or 10·23 per cent., owing almost exclusively to smaller consignments of wheat and other food-grains from the North-Western Provinces and Oudh to Calcutta and Bihar. In the case of the exports, however, the past year's trade showed an improvement of 7,56,429 maunds, or 4·45 per cent., chiefly under the heads coal and coke and tobacco, against a diminution under gunnies and unrefined sugar.

2. The total import and export trade, Province by Province, in respect of the above traffic during the past two years is given in the abstract below, which also shows the percentage borne by the trade of each Province to the total traffic:—

5. High prices ruled for the staple in the United Kingdom and the Continent, and this, coupled with the good outturn in the North-Western Provinces and Oudh and the Panjab during the past year, led to larger imports of this staple into Calcutta for shipment to Europe; there was also a better demand in Calcutta for consumption in the local mills. The exports by sea last year were 24 per cent.

Cotton, raw.

in excess of those of 1892-93; Germany is now the largest consumer of Bengal cotton.

6. The outturn of indigo in Bengal last year was small, and, in order to meet the demand from the United Kingdom, Austria, and Germany, Calcutta drew increased supplies from the North-Western Provinces and Oudh, where the crop was larger than in the year 1892-93. The exports by sea last year advanced by 24 per cent.

7. The large decline in the import trade was entirely due to smaller supplies from the North-Western Provinces and Oudh to Calcutta, which, however, received larger consignments from the Panjab and the Central Provinces. The past year was an unfortunate one for growers of corn in the United Kingdom, and it was expected that, with low sea freights and low exchange, Calcutta would have exported largely, as in the previous year; but such was not the case, though the shipments from Western India were in excess of those of 1892-93. The total exports from Calcutta by sea fell to one-third of what they were in the preceding year, and the reason for this decline is ascribed partly to a small crop in the producing districts up-country, partly to the inferior quality of the wheat, and partly to low prices in Europe.

8. The falling off in the imports of these cereals is due to the fact that in the year 1892-93 large supplies had to be drawn from the Central and Upper Provinces to meet a demand in Bihar caused by the partial failure of the crops, whereas in the year under review no such demand existed.

9. Notwithstanding that there was a good demand in Calcutta throughout the year for hides from the North-Western Provinces for export by sea, and that high prices prevailed, the imports from those Provinces showed a decline: perhaps the anti-cow-killing agitation up-country had some influence on the supply.

10. There was a revival in the import trade under this head, owing to there being a great demand for ghi in Calcutta and the Western Bengal block, and consequently the supplies received from all the ghi-producing districts in the North-Western Provinces and Oudh increased.

11. Owing to smaller production and a limited demand, the despatches from the North-Western Provinces and Oudh and the Panjab to Calcutta diminished. The sea-borne exports were lower during the past year than they have been for many years.

12. The decline in the import trade was confined to the supplies sent to Calcutta and the Western Bengal block from the North-Western Provinces and Oudh, where the sugarcane crop was not so good as in the previous year. The quantity of unrefined sugar exported to foreign ports from Calcutta increased, the shipments last year having amounted to 52,709 maunds, which was more than double the quantity (24,915 maunds) shipped in 1892-93.

13. The following statements show the principal articles of the export trade in which marked fluctuations occurred:—

14. There was again a falling off in the despatches of these goods from Calcutta to the North-Western Provinces and Oudh, where the demand was slack.

Cotton piece-goods.

15. In sympathy with the smaller import trade in food-grains, the exports of gunny bags and cloth to the North-Western Provinces and Oudh for bagging purposes declined.

16. Notwithstanding that the lac crop in the Chota Nagpur Division was much larger than in 1892-93, the exports of stick-lac, the raw material, to the North-Western Pro-

Lac.

vinces and Oudh fell off considerably owing to there being no demand in the Mirzapore district, which is the lac-manufacturing centre in those Provinces.

17. There was a decrease in the exports of sea-imported salt from Calcutta to the North-Western Provinces and Oudh.

Salt.

The only import of Sambhar salt in the year under report into the Lower Provinces was 186 maunds sent to Calcutta from Rajputana. The quantity of rock salt sent to Bihar from the Panjab was 97,296 maunds against 78,712 maunds in 1892-93, and to Calcutta 704 maunds against 359 maunds in the previous year.

18. The increase was entirely in the supplies of imported sugar sent from Calcutta to the North-Western Provinces and

Sugar.

Oudh. The sea-borne imports of refined sugar into Calcutta last year advanced by 56 per cent. in comparison with 1892-93. Of the countries from which the largest quantities are received, Mauritius stands first and Java second. There was a poor sugarcane crop in Bihar during the last year; yet, while there was a falling off in the quantity of unrefined sugar sent from that block to Bombay, the Central Provinces, and Rajputana, there was, on the other hand, a small increase in the despatches from the same block to the North-Western Provinces, Oudh, and the Panjab.

19. A good demand in the North-Western Provinces and Oudh led to larger consignments of unmanufactured tobacco from

the Bihar block, where the crop was better than in 1892-93.

INTERNAL TRADE OF BENGAL.

STATEMENT III.

THE following statement shows for the past two years the total weight of the internal rail-borne trade of Bengal carried between the different registration blocks within the Province, and the percentage of increase or decrease in the traffic of each block during 1893-94 as compared with 1892-93:—

In the total trade there was an improvement of 67,96,628 maunds, of which 59,29,540 maunds were in the downward trade, and 8,07,088 maunds in the upward trade. In the case of the Calcutta traffic, however, the downward trade declined by 24,15,100 maunds, while the upward trade advanced by 12,35,392 maunds, the net decrease being 11,79,708 maunds.

The principal fluctuations in the downward trade were an increase of 24,03,384 maunds under coal and coke, 17,10,812 maunds under rice, 14,39,362 maunds under linseed, 7,94,711 maunds under paddy, and 6,65,209 maunds under rape and mustard seed, against a falling off of 7,23,061 maunds under wheat, 4,72,063 maunds under jute, 2,91,694 maunds under stone and lime, and 1,06,250 maunds under kerosine oil. In the upward traffic, paddy exhibited a decline of 2,73,570 maunds, and iron of 88,490 maunds, while the trade in gunnies advanced by 70,252 maunds, gram and pulse by 48,496 maunds, and European cotton piece-goods by 26,262 maunds.

5. *Coal and coke.*—The downward trade again showed a considerable increase, owing to larger despatches from the Western Bengal and Bihar blocks to the Bracebridge Hall siding *via* Sealdah and the Kidderpore Docks, chiefly for export to Bombay, Madras, and Burma, and for steamer purposes. Owing to this diversion of the traffic, the consignments to Howrah from those two blocks showed a decline. The fluctuation in the upward traffic was insignificant.

6. *Cotton piece-goods (European).*—The despatches from Calcutta to the Bihar and Dacca blocks, where there was a demand, showed an improvement.

7. *Wheat.*—Though the wheat harvest in Bihar was much better than in 1892-93, there was a restricted demand for the article for export by sea, and therefore the imports into Calcutta from that block fell off.

8. *Rice and paddy.*—The increase under this head was due to larger despatches from the Western and Northern Bengal blocks to Calcutta to meet the demand for export to coast ports. There was also a larger movement of rice and paddy from the two blocks mentioned above and from Calcutta to the Eastern Bengal and Dacca blocks, where there was a scarcity, consequent on the crops having been partially damaged by floods. In the upward trade, there was a decrease in the supplies of rice sent from the Western Bengal block to Bihar, and from the Eastern Bengal block to the Northern Bengal block.

9. *Hides of cattle.*—There was a good demand for raw hides in Calcutta for shipment to Europe, and consequently the supplies from the Bihar, Northern Bengal, and Dacca blocks improved. The largest consumers of raw hides are, first, Germany, then the United Kingdom and Italy; the exports during the past year to Germany, however, fell off. As regards tanned hides, the United Kingdom stands first among the importing countries, but the demand last year was slack.

10. *Jute, raw.*—Though there was a larger area under cultivation in the principal jute-growing districts, the fibre was seriously damaged in certain places by excessive rain and floods; the outturn was, therefore, considerably below that of 1892-93, and prices ruled extremely high throughout the year. Owing to these causes, the supplies from the Eastern Bengal and Dacca blocks showed

a decrease. The exports of jute by sea from Calcutta were 16 per cent. below those of the previous year.

11. *Kerosine oil*.—The quantity of kerosine oil carried from Calcutta to the Eastern Bengal and Northern Bengal blocks showed an advance. Owing to its cheapness, this oil is rapidly ousting vegetable oils for burning purposes.

12. *Oil-seeds*.—There was a very brisk demand throughout the year for linseed as well as mustard seed for export to the United Kingdom and the Continent, and hence the consignments from the Bihar, Western Bengal, Eastern Bengal, and Northern Bengal blocks to Calcutta advanced considerably. The exports of linseed from Calcutta by sea during the past year were 33 per cent. in excess of those of 1892-93, while mustard seed shows an advance of 69 per cent. owing to a considerable curtailment in the crop on the continent of Europe, due to unfavourable weather.

13. *Salt*.—The exports of salt from Calcutta to the Northern Bengal, Dacca, and Chota Nagpur blocks showed an increase, while those to Bihar and the Eastern Bengal block declined owing to the diversion of traffic to the river.

14. *Saltpetre*.—Owing to unseasonable weather, the outturn of saltpetre in Bengal was below that of 1892-93, and this fact, coupled with a smaller demand for export by sea, led to a shrinkage in the supplies sent to Calcutta from Bihar.

15. *Sugar*.—Notwithstanding that the sugarcane crop was smaller than in 1892-93, the supplies of unrefined sugar sent to Calcutta and Western Bengal from the Eastern Bengal and Bihar blocks increased. There was a demand in Calcutta for consumption, and for export to the Upper Provinces.

16. *Tobacco, unmanufactured*.—The decrease under this head occurred in the supplies sent to Calcutta and Western Bengal from the Northern Bengal block, where the crop in the principal growing districts was injured during the past season by excessive rain. There was, moreover, no great demand for export by sea. Holland is now by far the largest importer of Indian tobacco, the shipment to that country last year being over 80 per cent. of the total exports by sea. The quantity shipped to the coast ports showed a great decline.
